These measurements are a guide only. You may find that fits vary from person to person depending upon shape.

To ensure a good fit please use the guidelines in the following diagram to help you to obtain body measurements and then compare them to the accompanying chart to see what size you need to order.

Please note:
DO NOT add anything to your measurement for comfort, as this will have been taken into account at the manufacturing stage of the garment.

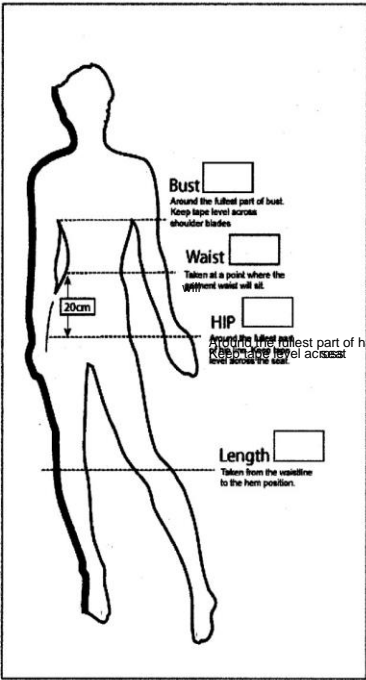

Take measurement over light clothing and as close to the body as possible, without being too tight.

Uniform clothing must be comfortable in its use, therefore please be as accurate as possible when taking your details.

Do not order sizes against anticipated weight loss.

This guide is formulated with the intended fit of your uniform in mind and does not cater for personal preference / style.
