

# Omitted and Delayed Medicines in Hospitals

Increase your understanding and avoid common errors.  
Do the course. Save a life.

## Who is this course for?

This course is aimed at all healthcare professionals who prescribe, dispense, review, supply or administer medicines in hospitals.

## Course details

The course promotes an increased awareness of the frequency and types of reported incidents, and harms that arise from omitted and delayed medicines in hospitals. Upon completion, learners will be able to describe safer practice to minimise the frequency and risk of harm arising from medicine omission and delay.
