

Safe Management of Diabetes During End of Life Care

Increase your understanding and avoid common errors.
Do the course. Improve patient experience.

Who is this course for?

This course is aimed at healthcare professionals who care for people with diabetes during the last year, months, weeks and days of life.

Course details

This course will increase your understanding of the management of diabetes during the last year and final days of life, helping patients to live as well as possible during this time. You will look at the impact diabetes has on end of life patient experience and consider how insulin and non-insulin therapies, together with safe medicines management can improve patient experience.
