

The Safe Management of Hypoglycaemia

Increase your understanding and avoid common errors.
Do the course. Save a life.

Who is this course for?

This course is primarily targeted at medical and nursing staff looking after adults with hypoglycaemia in all settings. Medical students, pharmacists and care home staff will also learn about the important aspects of caring for people with the condition.

Course details

This course is intended to help you recognise the signs and symptoms to safely and effectively treat hypoglycaemia. You should also know about how to prevent hypoglycaemia recurrence and when to seek further advice.
