

# Safe Management of People with Diabetes, Dementia, Depression and Severe Mental Illness

Increase your understanding and avoid common errors.  
Do the course. Improve patient experience.

## Who is this course for?

This course is aimed at healthcare professionals who care for people with diabetes who develop a mental illness including those with dementia, depression or severe mental illness and people with a mental illness who develop diabetes.

## Course details

This course will increase your understanding of the safe management of diabetes in people who also have dementia, depression or severe mental illness and the impact one condition has on the other. This course will also increase your understanding of how mental illness progressively impacts on the self-management skills of someone with diabetes.
